

Sabina Marat

IT Student & Graphic Designer

From an early age, I've been combining a passion for both math and creativity. In a math-informatics focused lyceum, discipline and perseverance were developed, and later combined these skills with graphic design. During university, freelance design work continued alongside part-time employment at a hotel. While adaptation may take some time, but once settled, I become a loyal employee. I enjoy teamwork, learning new things, and in general, I'm a hardworking person always eager to explore new opportunities!

EDUCATION

Czech University of
Life Sciences, Prague
2021 - currently
B.A. in Informatics
